WISH API Interface
Technical Specification

AR Master Insert/Update in PMS

Messages

Following section describes the valid request and response from the API. It also describes the response in case of failures.

The API's base URL for any request will be "http://<ServerURL>/api/" followed by the controller and action name like http://baseURL/WISHAPI/api/ARMasters

Communication
Web Prolific Service supports the exchange of messages via Hyper Text Transport Protocol (HTTP).
Security
Need to specify the Header authentication. One key has been added in configuration file to define authentication key value. It is required to pass for each request header, failure of authentication will get below error.
Response error message:

ResultStatusFlag =FAIL
Text = **Error in authentication**

This key value pair will check with the value coming in request file for authentication.

This method creates AR Master for a property in the WISH and returns status of success or failure.

Controller Name	**ARUpdateController**
Action Name	**Post**
URL	http://localhost/WISHAPI/api /ARUpdate/

ARMasterUpdateRQ Request	This request will contain following info to insert in database. this request is having list of API model like Arid ,AR Name, Address etc….

Request Parameter Details

Parameter	Type	Description
ARMasterXML	String	Actual XML data structure to be created AR Master.
PropertyID	String	Property id against which posting is getting done.
UserId	String	WISH User Id

Response Status

Response Value	Description
200	Success
100 or NULL	Fail

AR Master Delete

Controller Name	ARDeleteController
Action Name	Post
URL	http://localhost/WISHAPI/api /ARDelete/

Parameter	Type	Description
ARMasterXML	String	Actual XML data structure to be created AR Master.
PropertyID	String	Property id against which posting is getting done.
UserId	String	WISH User Id
AR ID in ARMasterXML	String	Specify AR ID (To delete)
Delete Indicator in ARMasterXML	String	D for Delete, F for Freeze

GL Insert/Update Details in PMS

This method creates GL Account code for a property in the WISH and returns status of success or failure.

Controller Name	GLUpdateController
Action Name	Post
URL	http://localhost/WISHAPI/api /GLUpdate/

Request Parameter Details

Parameter	Type	Description
GLMasterXML	string	Actual XML data structure to be created GL Master.
PropertyID	string	Property id against which posting is getting done.
UserId	string	WISH User Id

Response Status

Response Value	Description
200	Success
100 or NULL	Fail

GL Master Delete

Controller Name	GLDeleteController
Action Name	Post
URL	http://localhost/WISHAPI/api /GLDelete/

Parameter	Type	Description
GLMasterXML	string	Actual XML data structure to be created GL Master.
PropertyID	string	Property id against which posting is getting done.
UserId	string	WISH User Id
GLAcctCode in GLMasterXML	string	Particular gl code (you want to delete)

Delete Indicator in GLMasterXML	string	D for Delete, F for Freeze

Guest Self Service Module

1) Get Booking Summary :-

This API endpoint will return booking summary details of a guest.

a) Overview

URI : http://baseURL/WebAPI/api/selfservices/getbookingsummary

Method : POST

b) Authentication : clientID =, authCODE=

c) Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) Example Request

```
{
  "property_id":"property_id",
  "guest_id":"guest_id"
}
```

e) Example Response

```
{
  "confirmation_no":"10036968",
  "other_reference_no":"",

}
```

3) Get scan upload id documents:-

This API endpoint will save documents of a guest.

a) Overview

URI : http://baseURL/WebAPI/api/selfservices/getscanuploadiddocuments

Method : POST

b) Authentication : clientID =, authCODE=

c) Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) Example Request

```
{
   "property_id":"property_id",
   "guest_id":"guest_id"
}
```

e) Example Response

```
{
  "id_1_url": "",
  "id_1_url_is_dummy": "Y",
  "id_2_url": "",
  "id_2_url_is_dummy": "Y",
  "is_dummy_img": "Y",
  "property_id": "AHALT",
  "hotel_name": "ALTAIR",
  "hotel_address1": "ECOCENTRE, EM-4, EM BLOCK.",
  "hotel_address2": "SEC-V, SALTLAKE CITY. 19TH FLR",
  "hotel_city": "KOLKATA",
  "hotel_state": "WB",
  "hotel_zip": "700090",
  "hotel_country": "IN",
  "hotel_email": "",
  "hotel_contact_no": "",
  "hotel_logo_url": "",
  "guest_name": "JAIN NEHA",
  "stay_from": "21 Apr",
  "stay_to": "24 Apr 2020",

  "regitration_process": "N",
  "regitration_process_comments": "",
  "self_services_enabled": "Y",
  "status_code": "200"
}
```

4) Get Other Details:-

This API endpoint will return other details for a guest.

a) **Overview**

URI : http://baseURL/WebAPI/api/selfservices/getotherdetails

Method : POST

b) **Authentication** : clientID =, authCODE=

c) **Status Codes**

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) **Example Request**

```
{
  "property_id":"property_id",
  "guest_id":"guest_id"
}
```

e) **Example Response**

```
{
 "comments": "",
 "customized_fields": [
  {
   "field_code": "FIRNAME",
   "display_name": "Firm Name",
   "field_value": "",
   "field_type": "Text",
   "max_length": "60"
  },
  {
   "field_code": "CNAME",
   "display_name": "Contact Name",
   "field_value": "",
   "field_type": "Text",
   "max_length": "60"
```

```
    }
  ],
  "property_id": "AHALT",
  "hotel_name": "ALTAIR",
  "hotel_address1": "ECOCENTRE, EM-4, EM BLOCK.",
  "hotel_address2": "SEC-V, SALTLAKE CITY. 19TH FLR",
  "hotel_city": "KOLKATA",
  "hotel_state": "WB",
  "hotel_zip": "700090",
  "hotel_country": "IN",
  "hotel_email": "",
  "hotel_contact_no": "",
  "hotel_logo_url": "",
  "guest_name": "JAIN NEHA",
  "stay_from": "21 Apr",
  "stay_to": "24 Apr 2020",
  "reserve_status": "CF",

  "regitration_process": "N",
  "regitration_process_comments": "",
  "self_services_enabled": "Y",
  "status_code": "200"
}
```

5) Get Accompanying guest details:-

This API endpoint will return accompanying pax details of a guest.

a) Overview

URI : http://baseURL/WebAPI/api/selfservices/getaccompanyingguestdetails

Method : POST

b) Authentication : clientID =, authCODE=

c) Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) Example Request

```
{
   "property_id":"property_id",
   "guest_id":"guest_id"
}
```

e) Example Response

```
{
  "accompanying_guests": [
    {
      "sequence_no": "1",
      "full_name": "",
      "title": "",
      "first_name": "",
      "last_name": "",
      "ayc_ind": "A",
      "ayc_ind_description": "Adult",
      "photo_url": "",
      "is_update_id_1": "Y",
      "id_2_url": "",
      "is_update_id_2": "Y"
    }
  ],
  "title_list": [
    {
      "description": "MISTER",
      "value": "Mr."
    },
    {
      "description": "MISS",
      "value": "Ms."
    }
  ],
  "property_id": "AHALT",
  "hotel_name": "ALTAIR",
  "hotel_address1": "ECOCENTRE, EM-4, EM BLOCK.",
  "hotel_address2": "SEC-V, SALTLAKE CITY. 19TH FLR",
  "hotel_city": "KOLKATA",
  "hotel_state": "WB",
  "hotel_zip": "700090",
  "hotel_country": "IN",
  "hotel_email": "",
  "hotel_contact_no": "",
  "hotel_logo_url": "",
  "date_today": "Friday, 26 Jun 2020",
  "theme_image_url": "",
  "theme_header_back_color": "",
  "theme_header_text_color": "",
```

```
  "theme_details_back_color": "",
  "theme_details_text_color": "",
  "theme_footer_back_color": "",
  "theme_footer_text_color": "",
  "theme_button_back_color": "",
  "theme_button_text_color": "",
  "allow_partial_payment": "Y",
  "guest_photo_url": "data:image/png;base64",
  "guest_name": "JAIN NEHA",
  "stay_from": "21 Apr",
  "stay_to": "24 Apr 2020",
  "reserve_status": "CF",
  "walkin_ind": "N",
  "regitration_process": "N",
  "regitration_process_comments": "",
  "self_services_enabled": "Y",
  "status_code": "200"
}
```

6) Get Arrival and Billing details:-

This API endpoint will return arriving and billing details of a guest.

a) **Overview**

URI : http://baseURL/WebAPI/api/selfservices/getarrivalandbillingdetails

Method : POST

b) **Authentication** : clientID =, authCODE=

c) **Status Codes**

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) **Example Request**

```
{
   "property_id":"property_id",
   "guest_id":"guest_id"
}
```

e) **Example Response**

```
{
  "arriving_at": "11:00",
  "arriving_by": "9W1123",
  "billing_instructions": "",
  "hotel_name": "ALTAIR",
  "hotel_address1": "ECOCENTRE, EM-4, EM BLOCK.",
  "hotel_address2": "SEC-V, SALTLAKE CITY. 19TH FLR",
  "hotel_city": "KOLKATA",
  "hotel_state": "WB",
  "hotel_zip": "700090",
  "hotel_country": "IN",
  "hotel_email": "",
  "hotel_contact_no": "",
  "hotel_logo_url": "",
  "date_today": "Friday, 26 Jun 2020",
  "theme_image_url": "data:image/png",
  "theme_header_back_color": "",
  "theme_header_text_color": "",
  "theme_details_back_color": "",
  "theme_details_text_color": "",
  "theme_footer_back_color": "",
  "theme_footer_text_color": "",

  "walkin_ind": "N",
  "regitration_process": "N",
  "regitration_process_comments": "",
  "accompanying_guests_exist": "Y",
  "self_services_enabled": "Y",
  "status_code": "200"
}
```

7) Get Folio details:-

This API endpoint will return folio details of a guest.

a) **Overview**

URI : http://baseURL/WebAPI/api/selfservices/getfolio

Method : POST

b) **Authentication** : clientID =, authCODE=

c) **Status Codes**

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) **Example Request**

```
{
  "property_id":"property_id",
  "guest_id":"guest_id"
}
```

e) **Example Response**

```

9) Get Terms and Conditions:-

This API endpoint will return termsconditions description details.

a) Overview

URI : http://baseURL/WebAPI/api/selfservices/gettermsandconditions

Method : POST

b) Authentication : clientID =, authCODE=

c) Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) Example Request

```
{
   "property_id":"property_id",
   "guest_id":"guest_id"
}
```

e) Example Response

```
{
  "terms_condition_text": "  Hotels may use your information administration and marketing purposes including analyzing your travel and accommodation preferences. We may need to disclose your information to our service providers and agents for these purposes. By completing this form you concern to transfer your information to our administrations centers in Hong Kong and / or other countries where our hotels are situated. Further if you provide us with sensitive personal data about you, for example, health and dietary information, your consent to our processing such information for the above purposes. \n  \n  We may share your information with our group companies, service providers, agents or hotel owners and we, and / or they, may wish to contact you with special offers of goods, services or forthcoming events or promotions which may interest you. If you do not wish to be contacted for marketing or research purposes.\n  \n  All the information you give is voluntary. You have the legal right to apply for a copy of the information we hold on you and correct any inaccuracies as well as to object against its use of direct marketing or market research purposes.\n  \n  \n \n <br /><br />       MEDICAL UNDERTAKING\n   \n \n I hereby confirm that neither me nor any of my accompanied guests have reported having any of the following symptoms:\n \n \t-Running nose \n \t-Cough\n \t-Sneezing\n \t-Fever\n \t-Respiratory difficulty\n \n I undertake to immediately inform the General Manager / Operations Manager / Front Office Manager [Extn:_____] and the Government Helpline, should I, or any of my guests develop or have any of the above symptoms.\n \n I also undertake to initiate prompt action if notified by your associates regarding symptoms of my invited guests as mentioned above\n \n   \n ",

12) Get Initiate Payment:-

This API endpoint will return payment details of a guest.

a) **Overview**

URI : http://baseURL/WebAPI/api/selfservices/initiatepayment

Method : POST

b) **Authentication** : clientID =, authCODE=

c) **Status Codes**

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) **Example Request**

```
{
  "property_id": "",
  "reference_id": "",
  "other_supplementary_data": "GSS_BOOKING_SUMMARY_IH",
  "transaction_amount": "15000",
  "return_url": "http://BASEURL/guest/finalizepayment/"
}
```

e) **Example Response**

```
{
  "status_code": "200",
  "payment_url":
"https://prologicfirst.in/SmartLINKAPI/Redirect?SmartPayCode=87a18dd"
}
```

13) Finalize Payment:-

This API endpoint will return payment details of a guest.

a) **Overview**

URI : http://baseURL/WebAPI/api/selfservices/finalizepayment

Method : POST

b) **Authentication** : clientID =, authCODE=

c) **Status Codes**

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) **Example Request**

```
{
  "track_id": "7d2c3416-49eb-4620-a4ee-d89cf20c9a9d#862"
}
```

e) **Example Response**

```
{

  "property_id": "",
  "reference_id": "100277",
  "other_supplementary_data": "GSS_FOLIO_IH",
  "transaction_status": "VERIFIED"
}
```

16) Update Personal Details:-

This API endpoint will save perosnal details of a guest.

a) **Overview**

URI : http://baseURL/WebAPI/api/selfservices/updatepersonaldetails

Method : POST

a) **Authentication** : clientID =, authCODE=

b) **Status Codes**

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

c) **Example Request**

```
{
  "guest_id": "100283",
  "date_of_birth": "08 Dec 1970",
  "contact_number": "01244259715",
  "email_id": "test@domain.com",
  "address_1": "Udyog Vihar",
  "address_2": "",
  "address_3": "",
  "city": "Haryanazz",
  "state": "",
  "zip": "122100",
  "country": "IND",
  "nationality": "IN",
  "country_list": null,
  "nationality_list": null,
  "property_id": "AHALT"
}
```

d) **Response Success**

```
{"status_code":"200"}
```

e) **Reason Failure**

```
{
  "status_code": "10",
  "error": {
    "error_code": "10",
    "error_description": "Your details are currently accessed by hotel.  Please try after sometime.",
    "exception_message": ""
  }
}
```

18) Update Other Details:-

This API endpoint will save other details like firm name, billing address, gstn no, visa details of a guest.

a) **Overview**

URI : http://baseURL/WebAPI/api/selfservices/updateotherdetails

Method : POST

b) Authentication : clientID =, authCODE=

c) Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) Example Request

```
{
  "property_id": "",
  "guest_id": "",
  "comments": "comments",
  "customized_fields": [
    {
      "field_code": "FIRNAME",
      "field_value": "firm"
    },
    {
      "field_code": "CNAME",
      "field_value": ""
    }
  ]
}
```

e) Response Success

{"status_code":"200"}

f) Reason Failure

```
{
  "status_code": "10",
  "error": {
    "error_code": "10",
    "error_description": "Your details are currently accessed by hotel.  Please try after sometime.",
    "exception_message": ""
  }
}
```

20) Update Scan upload Documents:-

This API endpoint will upload Documents of a guest.

a) Overview

URI : http://baseURL/WebAPI/api/selfservices/updatescanuploadiddocuments

Method : POST

b) Authentication : clientID =, authCODE=

c) Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) Example Request

```
{
  "property_id": "",
  "guest_id": "100283",
  "id_1_url": " ",
  "id_2_url": ""
}
```

e) Response Success

```
{"status_code":"200"}
```

f) Reason Failure

```
{
  "status_code": "10",
  "error": {
    "error_code": "10",
    "error_description": "Your details are currently accessed by hotel.  Please try after sometime.",
    "exception_message": ""
  }
}
```

21) Update Arriving and Billing Details:-

This API endpoint will save arriving details of a guest.

a) **Overview**

URI : http://baseURL/WebAPI/api/selfservices/updatearrivalandbillingdetails

Method : POST

b) **Authentication** : clientID =, authCODE=

c) **Status Codes**

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) **Example Request**

```
{
  "guest_id": "100283",
  "arriving_at": "11:00",
  "arriving_by": "9W1123",
  "property_id": ""
}
```

e) **Response Success**

{"status_code":"200"}

f) **Reason Failure**

```
{
  "status_code": "10",
  "error": {
    "error_code": "10",
    "error_description": "Your details are currently accessed by hotel.  Please try after sometime.",
    "exception_message": ""
  }
}
```

22) Update Accompanying PAX Details:-

This API endpoint will save arriving details of a guest.

a) Overview

URI : http://baseURL/WebAPI/api/selfservices/updateaccompanyingguestdetails

Method : POST

b) Authentication : clientID =, authCODE=

c) Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) Example Request

```
{
  "property_id": "",
  "guest_id": "100283",
  "accompanying_guests": [
    {
      "sequence_no": "1",
      "full_name": "Capt Dinesh Bisht",
      "title": "Capt",
      "first_name": "Dinesh",
      "last_name": "",
      "ayc_ind": "A",
      "ayc_ind_description": "Adult",
      "photo_url": "",
      "is_update_photo": "N",
      "id_1_url": "",
      "is_update_id_1": "Y",
      "id_2_url": "",
      "is_update_id_2": "N",
      "is_update_data": "Y"
    }
  ]
}
```

e) **Response Success**

{"status_code":"200"}

f) **Reason Failure**

```
{
  "status_code": "10",
  "error": {
    "error_code": "10",
    "error_description": "Your details are currently accessed by hotel.  Please try after sometime.",
    "exception_message": ""
  }
}
```

23) Update Terms and Condition Details:-

This API endpoint will save signature and acceptance of terms and conditions as well as health conditions of a guest.

a) **Overview**

URI : http://baseURL/WebAPI/api/selfservices/updatetermsandconditions

Method : POST

a) **Authentication** : clientID =, authCODE=

b) **Status Codes**

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

c) **Example Request**

```
{
  "property_id": "",
  "guest_id": "100283",
  "signature_image": "",
```

```
  "acceptance_of_termsandconditions": "Y",
  "acceptance_of_healthconditions": "Y",
  "is_update_signature": "Y"
}
```

d) **Response Success**

{"status_code":"200"}

e) **Reason Failure**

```
{
  "status_code": "10",
  "error": {
    "error_code": "10",
    "error_description": "Your details are currently accessed by hotel.  Please try after sometime.",
    "exception_message": ""
  }
}
```

24) Update Feedback Details:-

This API endpoint will save feedback given by the guest.

a) **Overview**

URI : http://baseURL/WebAPI/api/selfservices/updatefeedback

Method : POST

b) **Authentication** : clientID =, authCODE=

c) **Status Codes**

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

d) **Example Request**

```
{
  "feedback_line_items": [
    {
```

```
      "feedback_type": "STAR",
      "feedback_code": "GRE",
      "value": "2"
    },
    {
      "feedback_type": "STAR",
      "feedback_code": "RCPN",
      "value": "3"
    },
    {
      "feedback_type": "STAR",
      "feedback_code": "STAF",
      "value": "4"
    },
    {
      "feedback_type": "STAR",
      "feedback_code": "TELE",
      "value": "2"
    },
    {
      "feedback_type": "STAR",
      "feedback_code": "WLCM",
      "value": "3"
    },
    {
      "feedback_type": "TEXT",
      "feedback_code": "CMNT",
      "value": "TESTFEEDBACK"
    }
  ],
  "guest_id": "100267",
  "property_id": ""
}
```

e) Response Success

```
{"status_code":"200"}
```

f) Reason Failure

```
{
  "status_code": "10",
  "error": {
    "error_code": "10",
    "error_description": "Your details are currently accessed by hotel.  Please try after sometime.",
    "exception_message": ""
  }
}
```

Search Booking Request:-

This API endpoint will get the details of a guest.

b) Overview

URI : http://baseURL/WebAPI/api/cform/reservation/searchbookings

Method : POST

f) Authentication : clientID =, authCODE=

g) Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

h) Example Request

Expected Parameters

Guest ID Wise Search Request

```
{
"hotel_code":"DEMO",
"booking_id":"157036",
"confirmation_number":"",
"room_type":"",
"guest_name":"",
"date_arrive":"",
"date_depart":"",
"contact_number":"",
"email_id":"",
"date_from":"",
"date_to":"",
"search_dates_in":"",
"search_for":"R"
}
```

Arrivals between Date Range - Request

This can be used for today'date + 7 days or more.

```
{
"hotel_code":"DEMO",
"booking_id":"0",
"confirmation_number":"",
"room_type":"",
"guest_name":"",
"date_arrive":"",
"date_depart":"",
"contact_number":"",
"email_id":"",
"date_from":"2018-01-01",
"date_to":"2018-01-08",
"search_dates_in":"",
"search_for":"R"
}
```

Guest Name Search Request

```
{
"hotel_code":"DEMO",
"booking_id":"0",
"confirmation_number":"",
"room_type":"",
"guest_name":"Monalisa",
"date_arrive":"",
"date_depart":"",
"contact_number":"",
"email_id":"",
"date_from":"",
"date_to":"",
"search_dates_in":"",
"search_for":"R"
}
```

Confirmation No. Search

Note: Confirmation No can be PMS Confirmation No Or External Reference No.

```
{
"hotel_code":"DEMO",
"booking_id":"0",
"confirmation_number":"GAA660",
"room_type":"",
"guest_name":"",
"date_arrive":"",
```

```
"date_depart":"",
"contact_number":"",
"email_id":"",
"date_from":"",
"date_to":"",
"search_dates_in":"",
"search_for":"R"
}
```

Room Type Search

```
{
"hotel_code":"DEMO",
"booking_id":"0",
"confirmation_number":"",
"room_type":"DUPX",
"guest_name":"",
"date_arrive":"",
"date_depart":"",
"contact_number":"",
"email_id":"",
"date_from":"",
"date_to":"",
"search_dates_in":"",
"search_for":"R"
}
```

Arrival Date Search

```
{
"hotel_code":"DEMO",
"booking_id":"0",
"confirmation_number":"",
"room_type":"",
"guest_name":"",
"date_arrive":"2018-01-01",
"date_depart":"",
"contact_number":"",
"email_id":"",
"date_from":"",
"date_to":"",
"search_dates_in":"A",
"search_for":"R"
}
```

Note: In Above, Set date in date_arrive and Indicator “A” in parameter “search_dates_in”

Departure Date Search

```
{
"hotel_code":"DEMO",
"booking_id":"0",
"confirmation_number":"",
"room_type":"",
"guest_name":"",
"date_arrive":"",
"date_depart":"2018-01-02",
"contact_number":"",
"email_id":"",
"date_from":"",
"date_to":"",
"search_dates_in":"D",
"search_for":"R"
}
```

Note: In Above, Set date in date_depart and Indicator “D” in parameter “search_dates_in”

Contact No. Search

```
{
"hotel_code":"DEMO",
"booking_id":"0",
"confirmation_number":"",
"room_type":"",
"guest_name":"",
"date_arrive":"",
"date_depart":"",
"contact_number":"9748213169",
"email_id":"",
"date_from":"",
"date_to":"",
"search_dates_in":"",
"search_for":"R"
}
```

Email Search

```
{
"hotel_code":"DEMO",
"booking_id":"0",
```

```
"confirmation_number":"",
"room_type":"",
"guest_name":"",
"date_arrive":"",
"date_depart":"",
"contact_number":"",
"email_id":"demo@abc.com",
"date_from":"",
"date_to":"",
"search_dates_in":"",
"search_for":"R"
}
```

Modified Records Only Search

```
{
"hotel_code":"DEMO",
"booking_id":"0",
"confirmation_number":"",
"email_id":"demo@abc.com",
"search_for":"M"
}
```

Note:

- If search_for input parameter value = “R” means search for Reserved Records
- If search_for input parameter value = “I” means search for Inhouse Records
- If search_for input parameter value = “C” means search for Checkouts guests only
- If search_for input parameter value = “M” means search for Guests which are modified in PMS
  In case of M, Advance Control “PDSINS” and “GSTSRC” should have same source value in Char field for which license is issued.
  PDSINS Int Value should be 1

i) Example Response

```

NOTE: - is_update_photo,
is_update_id_1,
is_update_id_2

These 3 Properties basically used to update Images.
Value should be Y if you want to update the image else N.

Sequence_no:- This Property basically used for accompanying pax running sequence e.g. for First Pax it will 1, for Second Pax it will be 2 and so on.

Send Category value which you received from PMS.

To update checkout_registration_number, checkout_registration_date
Send update_for_checkout = "Y" else this value will be "N"

WISH-BI API Methods

Property Info (Master)

This API endpoint will get the details of a Hotel Details defined in PMS.

Overview

URI : http://baseURL/WebAPI/api/bi/WishBI/getMasters

Method : POST

Authentication : clientID =, authCODE=

Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

Request

Expected Parameters

```
{
   "MastersEnum": "PROPERTY_INFO",
   "hotel_code": "DEMO",
   "source_id": "WISH"
}
```

Request Parameter Details:-

Parameter	Mandatory Fields	Type	Description
MastersEnum	Yes	String	Refer to request message value.
hotel_code	Yes	String	Property Id.
Source_id	Yes	String	Source Id

Response

```
{
   "status_code": "200",
   "prm_control": [
      {
```

```
            "date_business": "2022-04-19T00:00:00",
            "date_audit": "2022-04-19T00:00:00",
            "hotel_name": "ARAIYA HOTELS & RESORTS",
            "hotel_name_long": "NORWOOD HOLIDAY PVT.LTD.      ",
            "hotel_address1": "MORPANNI, KANDI VILLAGE,",
            "hotel_address2": "TAH: PALAMPUR, DISTT: KANGRA",
            "hotel_city": "PALAMPUR",
            "hotel_state": "HIMACHAL",
            "hotel_zip": "110001",
            "hotel_country": "INDIA",
            "property_id": "DEMO "
        }
    ]
}
```

Response Parameter Details:-

Parameter	Type	Description
date_business	Datetime	Business Date
date_audit	DateTime	Audit Date
hotel_name	String	Hotel Name
hotel_name_long	String	Hotel Long name
hotel_address1	String	Hotel Addresss 1
hotel_address2	String	Hotel Addresss 2
hotel_city	String	Hotel City
hotel_state	String	Hotel State
hotel_zip	String	Pin Code
hotel_country	String	Hotel Country
property_id	String	

Market Segment (Master)

This API endpoint will get the details of a market segments defined in PMS.

Overview

URI : http://baseURL/WebAPI/api/bi/WishBI/getMasters

Method : POST

Authentication : clientID =, authCODE=

Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

Request

Expected Parameters

```
{
   "MastersEnum": "MARKET_SEGMENT",
   "hotel_code": "DEMO",
   "source_id": "WISH"
}
```

Request Parameter Details:-

Parameter	Mandatory Fields	Type	Description
MastersEnum	Yes	String	Refer to request message value.
hotel_code	Yes	String	Property Id.
Source_id	Yes	String	Source Id

Response

```
{
   "status_code": "200",
   "prm_market_segment": [
      {
         "market_segment": "AIRL",
         "description": "Airlines",
         "market_segment_main_head": "CO",
         "print_seq_no": 151,
         "delete_flg": "N",
         "property_id": "DEMO",
         "gl_acct_code": ""
      },
      {
         "market_segment": "COMP",
         "description": "Complimentary",
         "market_segment_main_head": "OT",
```

```
            "print_seq_no": 80,
            "delete_flg": "N",
            "property_id": "DEMO ",
            "gl_acct_code": ""
        }
    ]
}
```

Response Parameter Details:-

Parameter	Type	Description
market_segment	String	Market Segment
Description	String	Description
market_segment_main_head	String	
print_seq_no	Int	
delete_flg	String	
property_id	String	
gl_acct_code	String	

Business Source (Master)

This API endpoint will get the details of a Business Source defined in PMS.

Overview

URI : http://baseURL/WebAPI/api/bi/WishBI/getMasters

Method : POST

Authentication : clientID =, authCODE=

Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

Request

Expected Parameters

```
{
    "MastersEnum": "BUSINESS_SOURCE",
    "hotel_code": "DEMO",
```

```
    "source_id": "WISH"
}
```

Request Parameter Details:-

Parameter	Mandatory Fields	Type	Description
MastersEnum	Yes	String	Refer to request message value.
hotel_code	Yes	String	Property Id.
Source_id	Yes	String	Source Id

Response

```
{
   "status_code": "200",
   "prm_business_src": [
      {
         "business_source": "CORP",
         "description": "CORPORATE",
         "business_src_main_head": "OT",
         "print_seq_no": 112,
         "delete_flg": "N",
         "property_id": "DEMO "
      },
      {
         "business_source": "CT  ",
         "description": "CONSORTIA",
         "business_src_main_head": "OT",
         "print_seq_no": 107,
         "delete_flg": "Y",
         "property_id": "DEMO "
      }
   ]
}
```

Response Parameter Details:-

Parameter	Type	Description
business_source	String	Business Source
Description	String	Description
business_src_main_head	String	
print_seq_no	Int	
delete_flg	String	
property_id	String	

Block No (Master)

This API endpoint will get the details of a Block No defined in PMS.

Overview

URI : http://baseURL/WebAPI/api/bi/WishBI/getMasters

Method : POST

Authentication : clientID =, authCODE=

Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

Request

Expected Parameters

```
{
   "MastersEnum": "BLOCK_NO",
   "hotel_code": "DEMO",
   "source_id": "WISH"
}
```

Request Parameter Details:-

Parameter	Mandatory Fields	Type	Description
MastersEnum	Yes	String	Refer to request message value.
hotel_code	Yes	String	Property Id.
Source_id	Yes	String	Source Id

Response

```
{
   "status_code": "200",
   "prm_block_no": [
      {
         "block_no": "V1",
```

```
            "description": "VILLA",
            "delete_flg": "N",
            "property_id": "DEMO "
        },
        {
            "block_no": "V2",
            "description": "VILLA",
            "delete_flg": "N",
            "property_id": "DEMO "
        }
    ]
}
```

Response Parameter Details:-

Parameter	Type	Description
block_no	String	Block No
Description	String	Description
delete_flg	String	
property_id	String	

Revenue Types (Master)

This API endpoint will get the details of a Revenue Types defined in PMS.

Overview

URI : http://baseURL/WebAPI/api/bi/WishBI/getMasters

Method : POST

Authentication : clientID =, authCODE=

Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

Request

Expected Parameters

```
{
   "MastersEnum": "REVENUE_TYPE",
   "hotel_code": "DEMO",
   "source_id": "WISH"
}
```

Request Parameter Details:-

Parameter	Mandatory Fields	Type	Description
MastersEnum	Yes	String	Refer to request message value.
hotel_code	Yes	String	Property Id.
Source_id	Yes	String	Source Id

Response

```
{
   "status_code": "200",
   "prm_revenue_type": [
      {
         "revenue_type": "FB",
         "description": "FOOD & BEVERAGE",
         "room_other_flg": "F",
         "gh_acumulate_flg": "Y",
         "delete_flg": "N",

            "max_youth": 0
        }
    ]
}
```

Response Parameter Details:-

Parameter	Type	Description
room_type	String	Room Type
Description	String	Description
delete_flg	String	
suite_flg	String	
property_id	String	
bed_type	String	
no_of_beds	Int	
room_bed_roh_ind	String	
block_no	String	Refer to Block No master for code/description.
long_description	String	Long description
category_id	String	
dummy_ind	String	
max_pax	Int	

max_child	Int	
component_yn	String	
component_exists	String	
hk_credits	Int	
print_seq_no	Int	
max_youth	Int	

Domicile Code (Master)

This API endpoint will get the details of Domicile or Country Code defined in PMS.

Overview

URI : http://baseURL/WebAPI/api/bi/WishBI/getMasters

Method : POST

Authentication : clientID =, authCODE=

Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

Request

Expected Parameters

```
{
   "MastersEnum": "DOMICILE_CODE",
   "hotel_code": "DEMO",
   "source_id": "WISH"
}
```

Request Parameter Details:-

Parameter	Mandatory Fields	Type	Description
MastersEnum	Yes	String	Refer to request message value.
hotel_code	Yes	String	Property Id.
Source_id	Yes	String	Source Id

Response

```
{
   "status_code": "200",
   "prm_domicile": [
      {
         "domicile_code": "IN  ",
         "description": "India              ",
         "domicile_code_main_head": "WA",
         "print_seq_no": 102,
         "delete_flg": "N",
         "property_id": "DEMO ",
         "country_code": "IN  ",
         "nationality_desc": "Indian                    ",
         "code": "IND      "
      },
      {
         "domicile_code": "AU  ",
         "description": "Australia          ",
         "domicile_code_main_head": "OZ",
         "print_seq_no": 13,
         "delete_flg": "N",
         "property_id": "DEMO ",
         "country_code": "AU  ",
         "nationality_desc": "Australian                ",
         "code": "AUS      "
      }
   ]
}
```

Response Parameter Details:-

Parameter	Type	Description
domicile_code	String	Domicile Code
Description	String	Description.
domicile_code_main_head	String	
print_seq_no	Int	
delete_flg	String	
property_id	String	
country_code	String	Country Code. If Domicile Code and Country code having same value then its country else domicile.
nationality_desc	String	Nationality Description
Code	String	ISO Code.

Corporate Account (Master)

This API endpoint will get the details of Corporate Account defined in PMS.

Overview

URI : http://baseURL/WebAPI/api/bi/WishBI/getMasters

Method : POST

Authentication : clientID =, authCODE=

Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

Request

Expected Parameters

```
{
   "MastersEnum": "CORPORATE_ACCOUNT",
   "hotel_code": "DEMO",
   "source_id": "WISH"
}
```

Request Parameter Details:-

Parameter	Mandatory Fields	Type	Description
MastersEnum	Yes	String	Refer to request message value.
hotel_code	Yes	String	Property Id.
Source_id	Yes	String	Source Id

Response

```
{
    "status_code": "200",

Response Parameter Details:-

Parameter	Type	Description
date	String	
business_source	String	Refer to business Source master for details.
class_name	String	
no_of_resvns	Int	No Of Reservations
no_of_resvns_arr	Int	No Of Reservations Arrival
no_of_cancels	Int	No Of Cancels
no_of_no_shows	Int	No of No-shows
no_of_turn_aways	Int	No of Turn-aways
room_nights	Double	Room Nights
room_revenue	Double	Room Revenue
adult_nights	Double	Adult Nights
youth_nights	Double	Youth Nights
child_nights	Double	Child Nights

total_revenue	Double	Total revenue
fb_revenue	Double	F&B Revenue
minor_revenue	Double	Minor Operating Revenue
no_of_refusals	Int	No Of Refusals
property_id	String	
no_of_fit_rm_nights	Double	No Of FIT Room Nights
no_of_grp_rm_nights	Double	No Of Group Room Nights
total_payments	Double	Total Payments
sngl_occupied_dbl_rms	Int	
no_of_late_cancels	Int	
no_of_early_depart	Int	
no_of_late_depart	Int	
no_of_vip_guests	Int	
fit_total_revenue	Double	FIT Total Revenue
grp_total_revenue	Double	Group Total Revenue
no_of_extra_bed	Int	
block_no	String	Refer to Block Master for details.
total_hours	Double	

MIS Market Segment (Count Daily)

This API endpoint will get the details of a Market Segment (Count Daily) defined in PMS.

Overview

URI : http://baseURL/WebAPI/api/bi/WishBI/getBIDetails

Method : POST

Authentication : clientID =, authCODE=

Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

Request

Expected Parameters

```
{
   "BIEnum": "MIS_MARKET_SEGMENT_CNT_DAILY",
   "hotel_code": "DEMO",
   "source_id": "WISH",
   "date_from": "2022-04-17",
   "date_to": "2022-04-18"
```

```
}
```

Request Parameter Details:-

Parameter	Mandatory Fields	Type	Description
BIEnum	Yes	String	Refer to request message value.
hotel_code	Yes	String	Property Id.
source_id	Yes	String	Source Id
date_from	Yes	String	Date From, Format yyyy-MM-dd
date_to	Yes	String	Date To, Format yyyy-MM-dd

Response

```
{
   "status_code": "200",
   "mis_mkt_seg_count_daily": [
      {
         "date": "2022-04-17T00:00:00",

```

Response Parameter Details:-

Parameter	Type	Description
date	String	
nationality_code	String	Refer to domicile code master for details.
class_name	String	
room_nights	Double	Room Nights
room_revenue	Double	Room Revenue
adult_nights	Double	Adult Nights
youth_nights	Double	Youth Nights

child_nights	Double	Child Nights
no_of_resvns	Int	No Of Reservations
no_of_resvns_arr	Int	No Of Reservations Arrival
no_of_cancels	Int	No Of Cancels
no_of_no_shows	Int	No of No-shows
no_of_turn_aways	Int	No of Turn-aways
total_revenue	Double	Total revenue
fb_revenue	Double	F&B Revenue
minor_revenue	Double	Minor Operating Revenue
no_of_refusals	Int	No Of Refusals
property_id	String	
no_of_fit_rm_nights	Double	No Of FIT Room Nights
no_of_grp_rm_nights	Double	No Of Group Room Nights
total_payments	Double	Total Payments
sngl_occupied_dbl_rms	Int	
no_of_late_cancels	Int	
no_of_early_depart	Int	
no_of_late_depart	Int	
no_of_vip_guests	Int	
fit_total_revenue	Double	FIT Total Revenue
grp_total_revenue	Double	Group Total Revenue
no_of_extra_bed	Int	
block_no	String	Refer to Block Master for details.
total_hours	Double	

MIS Room Type Code (Count Daily)

This API endpoint will get the details of a Room Type Code (Count Daily) defined in PMS.

Overview

URI : http://baseURL/WebAPI/api/bi/WishBI/getBIDetails

Method : POST

Authentication : clientID =, authCODE=

Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

Request

Expected Parameters

```
{
   "BIEnum": "MIS_ROOM_TYPE_CNT_DAILY",
   "hotel_code": "DEMO",
```

```
    "source_id": "WISH",
    "date_from": "2022-04-17",
    "date_to": "2022-04-18"
}
```

Request Parameter Details:-

Parameter	Mandatory Fields	Type	Description
BIEnum	Yes	String	Refer to request message value.
hotel_code	Yes	String	Property Id.
source_id	Yes	String	Source Id
date_from	Yes	String	Date From, Format yyyy-MM-dd
date_to	Yes	String	Date To, Format yyyy-MM-dd

Response

```

```

Response Parameter Details:-

Parameter	Type	Description
sequence_no	Int	
period_start	String	Period Start date
period_end	String	Period End Date
revenue_type	String	Refer to Revenue Type master for details.
Revenue	Double	Revenue
Quantity	Double	Quantity
property_id	String	

MIS X-Tab Header

This API endpoint will get the details of a MIS X-tab Header defined in PMS.

Overview

URI : http://baseURL/WebAPI/api/bi/WishBI/getBIDetails

Method : POST

Authentication : clientID =, authCODE=

Status Codes

- 200 : (SUCCESS)
- 400 : (BAD_REQUEST). The request is invalid or improperly formed. Server could not understand the request
- 401 : (Unauthorized). Access is denied due to invalid credentials
- 500 : (INTERNAL_SERVER_ERROR). The request failed due to an internal error.

Request

Expected Parameters

```
{
   "BIEnum": "MIS_XTAB_REVENUE",
   "hotel_code": "DEMO",
   "source_id": "WISH",
}
```

Request Parameter Details:-

Parameter	Mandatory Fields	Type	Description
BIEnum	Yes	String	Refer to request message value.
hotel_code	Yes	String	Property Id.
source_id	Yes	String	Source Id

Response

```
{
    "status_code": "200",
    "mis_xtab_header": [
        {
            "sequence_no": 1,
            "market_segment": "GPLS",
            "business_source": "DS  ",
            "domicile_code": "IN  ",
            "corp_acct_id": "      ",
            "ta_id_w": "         ",
            "ta_id_r": "         ",

            "rate_type": "M",
            "property_id": "DEMO ",
            "suite_bed_ind": "N",
            "room_type": "DP  "
        }
    ]
}
```

Response Parameter Details:-

Parameter	Type	Description
sequence_no	Int	
market_segment	String	Refer to market segment master.
business_source	String	Refer to business source master
domicile_code	String	Refer to domicile code master.
corp_acct_id	String	Refer to corporate account master
ta_id_w	String	Refer to travel agent master
ta_id_r	String	Refer to travel agent master
allot_type	String	
fit_grp_crw_spl_ind	String	
rate_type	String	
property_id	String	
suite_bed_ind	String	
room_type	String	Refer to room type master.
